Complete registration of amusement rides includes submittal of descriptive name and serial number of amusement rides operated within the state.
Failure to register rides completely before opening to the public results in late registration fees and potential red-tagging of the ride.

NOTE: The department has 15 business days to process the registration application and grant a registration or issue a denial.

If your ride requires annual non-destructive testing, report it on form SBD-10866 (included with your registration packet).
