

Storage Tank Database Information

Search Instructions

DISCLAIMER FOR STORAGE TANK DATABASE INFORMATION

This web site contains information derived from tank registration information supplied to the Wisconsin Department of Agriculture, Trade & Consumer Protection (DATCP) (Department) from outside sources. This information is provided as a convenience to assist the public in knowing what information is in the Department's files. The Department adds information to this web site as soon as possible after information is provided to the Department. The Department does not ensure that the web site will contain up-to-date information. The tank data information associated with a tank search is refreshed every weekend. The date listed on the web site as the "This document last revised" is the last date on which the Department modified the screen format of this web site.

The Department does not and cannot guarantee or certify the accuracy of this information. The information at this web site is provided "as is" without representations or warranties of any kind, either express or implied. Each person obtaining information from this resource assumes full responsibility and all risks arising from the use of and reliance on the information contained on this web site.

This information may not contain complete or current information on a specific tank. The information may contain errors and omissions, including, but not limited to, technical inaccuracies or typographical errors. The Department reserves the right to make additions, deletions or modifications to the information contained on this web site.

Because the information furnished or the database format may be different than the initial search query, a successful search may be the result of several queries using different key words. Please refer to the Search Tips & Instructions section below to obtain more search query information.

This is a zip file of more than 195,000 records in a comma delimited text format suitable for most database and spreadsheet applications. Zipped size of 7.7 Mb, expands to 50 Mb when unzipped. It contains a tank database table and related encode conversion tables. It is updated weekly. You need an unzip utility to process the file. If one is not available on your workstation, several are recommended. Click on the icons below for download of the product. No warrantee of any kind, express or implied, is made in reference to these products.

GENERAL INFORMATION

If you have questions or concerns regarding the Wisconsin Department of Agriculture, Trade & Consumer Protection Storage Tank information please contact one of the following:

Storage Tanks General Information (608) 224-5150

Storage Tank Permit or Registration Information (608) 224-5155

Retail Motor Fuel Dispensing Information ([DATCP](#))

Effective 10/01/97 Wang ID Numbers are not assigned to tank registrations. The Wang ID number is obsolete and has been replaced by the Regulated Object ID Number. The Wisconsin Department of Agriculture, Trade & Consumer Protection (DATCP) is not responsible for maintaining the Wang Number as a primary identifier.

SEARCH TIPS & INSTRUCTIONS

- **Searching by different criteria may produce different results because of missing or partially matched information.**

Example 1: A search by fire department ID or site information may not show all tanks within that area because a number of tanks are missing general site information.

Example 2: A search by street name, such as First Street, will not show tanks with a street address of First St., 1st Street, or 1st St. It will show tanks on First Street in Madison, Eau Claire, LaCrosse, and any other city that has a tank site address of First Street, unless you limit the results by entering a municipality or county.

Search Instructions

- There are 2 screens from which to start a search. If you know the tank number, either the regulated object number or the Wang ID number, use the Search by Tank ID screen. It will provide the fastest result. If you are searching by another attribute or combination of attributes, the Search by Site, Owner, or Tank Characteristics screen is the one to use.
- Enter as many identifying fields on the search criteria screen as possible to limit your search results. Avoid entering a street address without also entering a municipality or county.
- Search fields are not case sensitive, that is, it is not necessary to capitalize any letters.
- Make use of the percent sign (%) as a wildcard indicators in the street address. The % stands for zero or more characters within the address. The search examines where the criteria exists within the data. Some examples:
 - "102 main" will find all addresses with "102 Main" in the address; examples: 102 Main St, 2102 Main Avenue.
 - "2%lake" will find any address in the 200, 2000, 20000, etc. block of any street with "lake" in it, for example, "2206 Lake Edge", "20544 Mirror Lake Rd", or "202 E. Lake St".
- The owner name is to be entered as *last name, first name* for an individual, or *business name* for a business. The search returns records matching on words entered, or sounds like on the last name. If unable to locate, you can enter a portion of the name which includes last name or first word of the business name (excluding common prepositions like *the*). The database name field is not consistently formatted. In some records the last name appears first, and in other records first name is before last name. Therefore, if it is necessary to search reversing using the name field.

If you enter "meyer", any records which have an owner name sounding like Meyer, as example "Maier", "Major", or "Mayers" will appear on the list.

Deleted - See Comments

This is a notation from the Department's database reflecting the tank has been deleted from the database. The comment information is not accessible via the Internet search site. A tank is deleted if the Department has determined that the respective tank data is a duplicate or false entry. It **is not** a tank that has been closed by removal.

Tank Detail Inspection Status

Many tanks **require** periodic inspections by Certified Tank Inspectors that are either employed by Commerce or employed by companies under contract with the department. Tanks under the designated inspection program have an inspection status listed at the bottom of the respective web page. The status codes are as follows:

CLOS - Inspection closed due to no noncompliance issues or compliance issues have been corrected and violations no longer exist.

CLNI - Tank was not inspected the respective fiscal year.

INVS - Inspection has resulted in the need for further investigation or assessment or additional records to determine compliance.

Order - Noncompliance order has not yet been satisfied and inspection is still open.

2NOT - Second notice with compliance date.

EXTN - Extension of compliance date.

RLEG - Refer to Legal by supervisor or management.

RMAN - Refer to management by inspector as a result of not gaining compliance.

RSUP - Refer to supervisor by Commerce inspector.

Download Information:

The download information will appear in format compatible with Microsoft Excel. The download gives the document the file name "TankList." You must add the file type suffix ".csv" to the end of the name that you are placing in the File Name box. You probably want to give the document a name specific to the search information, rather than continuing to use TankList. Example: MadisonInUseUst.csv. Once the information is saved on your PC you can format the columns and rows to your satisfaction.

The information that is being downloaded includes the site address, but, does not include the owners address which may be different than the site address. Link to codes used on the download spreadsheet.
