Search Clear

* To display all runs, leave all text boxes blank and click the Search button.
** Only the services that have their State Fire Dept. ID (FDID) and State filled out will be listed here.
Any runs that were entered for services when their state was not documented underneath Service Setup, will also be missing the state on the run.
The NFIRS export will not export runs with missing states on them.

1. Include Department Export: This will export any department related information in the header of the file.
2. Include Personnel Export: This will export all the personnel information for the department in the header of the file.
3. Include Apparatus Export: This will export all the vehicle/apparatus information for the department in the header of the file.
4. Include Non-NFIRS State Specific Data Points: This will export any data points that are collected by the State in addition to NFIRS. These will only be exported if they are documented within an NFIRS run and contain data in them.
5. Include EMS Data Points: This will export the EMS Module data within an NFIRS run.
6. Include Incident Apparatus Data Points: This will export the Apparatus Module data within an NFIRS run.

Choose which runs to export through the boxes on the Left of each run >> Click Export

Display: 15

Tip: Always change display to All
