The bid document for this site states that MW-6, MW-10, MW-16, and MW-17 have been destroyed. Will these wells also need to be properly abandoned, and is this part of the bid?

The only well unaccounted for is MW-10. A search needs to be made for this well and if found, properly abandoned. If it can't be accounted for, the circumstances of the well will be put on the property deed. It is a PECFA eligible expense and will be necessary to get closure. It should be included in the bid.

Will replacement of MW-6, MW-10, MW-16, and MW-17 be considered PECFA eligible, and therefore included in the bid response?

If the reinstallation of the wells are necessary to establish a viable monitoring network, then the costs should be included in the bid. The eligibility of these costs will be decided at claim review time.
