

Bid Round 16

Hillcrest Mini Mart

BRRTS #03-71-001195
PECFA #54947-9774-32-A

Q1: It appears that the site was originally bid in Round 3. The conditions of the bid state that the acceptance of the bid was completion to a pre-determined closure method or a no-further action status.

It also appears that Advent was the environmental consulting firm utilized to conduct the site investigation, Advent also was the acceptable low cost bid provider and was ultimately awarded the bid portion of the project through closure. It does not appear that the environmental factors have changed and no "changed conditions" were mentioned in the report. Why then is this project being directed to the bidding arena again?

A1: This site was not bid to closure in Round #3. Bids were accepted on a very specific scope of work with the intention of bidding to closure after the data was gathered. See Section 3 and Section 4 of Hillcrest bidspec from Round #3.

Q2: Are there any analytical results from PZ2?

A2: No, PZ-2 has been dry since it was installed in October 1999.
