Should the cost to replace the two underground electric lines be included in the bid as PECFA eligible expense?

Yes

Are there any soil cuttings from the SI (either in drums or stockpiled) that need to be disposed of during the remediation?

The Department is unaware of the waste disposal status involved with the Site Investigation Phase.

Has WDNR/WDCOM established a minimum volume of soil that must be removed from the site?

No

We are asked to notify WDCOM in our bid if we don't think we can achieve site closure under the maximum PECFA award for the site. However, we are never told how much has been spent on the SI, so it is impossible to determine this. What is the approximate amount (including interest) that has been spent on the SI over the last 9 years?

The total amount reimbursed by PECFA to-date is approximately \$67,000, excluding interest.
