Question 1: What is the sampling frequency for monitoring well MW-15? The table does not include the well in it?

Answer: Monitoring well MW-15 should be sampled annually.

Question 2: What is the number of sampling event to be taken at the site? The narrative describes that semi-annual sampling should be performed for two years and the tabulation table at the end of the document uses the multiplier factor 8 for sampling events.

Answer: The correct multiplier factor for sampling events on the 3<sup>rd</sup> page tabulation table should be 4.
