Q: Your spec requires the sampling of “all wells” but does not mention how many wells this is, as many other specs do. Please provide this information in your responses.

A: As indicated in the bid specification, all wells in the monitoring well network, excluding MW-1, shall be included in the additional quarterly groundwater monitoring schedule. These would include the existing wells MW2, MW3, MW4, MW5 and P5, and the three newly installed wells (one ‘water table” well and two “piezometers”). Also, as indicated in the bid specification, the irrigation well for the golf course shall be included in the quarterly groundwater sampling.
