Assumptions Used in Arriving at Fiscal Estimate

The proposed rules serve two purposes. One part of the rules implements Wisconsin Act 182 which allows the Department to directly assess forfeitures to individuals who violate the licensing provisions of s. 145.06, Stats. The rules establish the process for assessing and appealing the forfeitures. The other part of the rules clarifies s. 182.0715 (2r), Stats., which requires the installation of tracer wire or some equally-effective means of locating non-metallic underground sewer and water laterals. The rules establish specific methods for complying with this legislative mandate. The department does not anticipate that the rules will substantially increase its workload and the workload can be accommodated with current resources.

The cost for installers to provide a method for locating non-metallic sewer and water laterals is dependent upon various variables. Depending upon the method chosen and the length of the installation, the department estimates that installation costs can be as little as \$10 per installation utilizing GIS technology, or \$1.00 per foot utilizing tracer wire.

Long-Range Fiscal Implications
