RADIOGRAPHY EXAMINING BOARD LIMITED X-RAY MACHINE OPERATOR (LXMO) PROGRAM CURRICULUM

APPLICANT: Complete this section and submit to certifying school for completion. Form must be returned directly from the school to the Department.

Last Name	First Name	MI	Former / Maiden Name(s)
<input style="width: 95%;" type="text"/>	<input style="width: 95%;" type="text"/>	<input style="width: 95%;" type="text"/>	<input style="width: 95%;" type="text"/>
Address (number/street)		(city)	(state) (zip code)
<input style="width: 95%;" type="text"/>		<input style="width: 95%;" type="text"/>	<input style="width: 95%;" type="text"/>
Mailing Address (if different) (number/street)		(city)	(state) (zip code)
<input style="width: 95%;" type="text"/>		<input style="width: 95%;" type="text"/>	<input style="width: 95%;" type="text"/>
Date of Birth	Social Security Number (voluntary-for use by school to locate your records)	Date of Graduation (Anticipated dates of graduation will not be accepted.)	
<input style="width: 25%;" type="text"/> / <input style="width: 25%;" type="text"/> / <input style="width: 50%;" type="text"/>	<input style="width: 50%;" type="text"/>	<input style="width: 25%;" type="text"/> / <input style="width: 25%;" type="text"/> / <input style="width: 50%;" type="text"/>	
Application Number	Daytime Phone Number		
<input style="width: 95%;" type="text"/>	<input style="width: 95%;" type="text"/> Ext <input style="width: 20%;" type="text"/>		
<p>ATTESTATION OF APPLICANT: I declare that I am the person referred to on this form and that all information required to be completed by me (the applicant for a credential), is complete and accurate to the best of my knowledge and belief. Furthermore, I declare that after completing the information that was required by me (and only that information) the form was forwarded to the relevant third-party for completion of the information asked of them. I also declare that to the best of my knowledge the completed form was provided to the Department of Safety and Professional Services by the relevant third-party (and not by me, the applicant). Finally, I declare that I understand that failure to provide the requested information, making any materially false statement and/or giving any materially false information in connection with my application for a credential may result in credential application processing delays; denial, revocation, suspension, or limitation of my credential; or any combination thereof; or such other penalties as may be provided by law. By signing below, I am signifying that I have read and understand the above declarations.</p>			
<input style="width: 95%;" type="text"/>		<input style="width: 25%;" type="text"/> / <input style="width: 25%;" type="text"/> / <input style="width: 50%;" type="text"/>	
Applicant Signature		Date	
(If unable to provide a digital signature, please print and sign form.)			

CERTIFYING SCHOOL: Complete this section for the above-named applicant and return directly to the Department using the LicensE Third-Party* Upload Portal at license.wi.gov. You will need the application number shown above. (*For form completion purposes, the term "Third-Party" refers to any non-applicant or non-DSPS individual or entity submitting required documentation in support of a credential application.)

Enter the number of classroom hours of study the applicant has completed in the eight (8) areas that are listed below. The total must be between the range of 384 - 432 hours or more.*

COURSE CONFIGURATION: (hours and credits)		
Required Hours	Course Title	Minimum Required Credits
48	Introduction to Radiography (48 required)	3
48	Radiographic Imaging 1 (48 required)	3
48	Radiographic Imaging 2 (48 required)	3
32-80	Radiographic Procedures 1 (32-80 required)	2-5
48	Imaging Equipment Operation (48 required)	3
48	Radiation Protection and Biology (48 required)	3
16	Radiographic Pathology (16 required)	1
96-340	Radiography Clinical (96-340 required)	3-6
384-432	Total Program Hours*	Total Credits 21-27

ATTESTATION AND AFFIDAVIT OF THIRD-PARTY PROVIDING INFORMATION RELATED TO APPLICANT: I declare, on behalf of the third-party asked to provide information related to the applicant identified on this form, that the information provided is true and correct to the best of my knowledge and belief. I further declare that after completing the form I, or other third-party staff, will provide the completed form directly to the Wisconsin Department of Safety and Professional Services for review. By signing below, I am signifying that I have read, understand, and have complied with the above declarations. **I attest to the fact that the above named applicant completed 384-432 hours of classroom study in a training program in limited x-ray machine operator (LXMO) listed above.**

Signature of Dean or Department Head

Wisconsin Department of Safety and Professional Services

Description:

LXMO curriculum prepares individuals for a career in diagnostic imaging. The LXMO produces images of limited area of the human body to aid physicians in the diagnosis of injuries and diseases. Applicants for a LXMO permit meeting all of the curricular requirements would be eligible to take the State of Wisconsin certification examination administered by the American Registry of Radiography Technologists (ARRT). Upon successful completion, individuals may obtain employment in x-ray departments associated with medical clinics, veterinary clinics, and private offices.

The LXMO curriculum focuses on theoretical and applied radiography and includes a clinical experience in an imaging department. Applicants should have learned to use x-ray imaging machines to demonstrate body parts on x-ray films for diagnostic purposes and minimizing.

External Requirements

Curriculum Outcomes

A. Carryout the production and evaluation of radiographic images

Direct Measures: Clinical Evaluation

Criteria:

1. Position patient for specified examination
2. Select appropriate image production exposure factors and make exposure
3. Evaluate final images for acceptable exposure quality, anatomical presentation, and
4. patient identifying information

B. Apply computer skills in the radiographic clinical setting

Direct Measures: Clinical Evaluation

Criteria:

1. Orient and annotate image
2. Prepare and send images to archive or PACS

C. Practice radiation safety principles

Direct Measures: Clinical Evaluation

Criteria:

1. Use proper collimation
2. Shield patient and others
3. Wear personal dosimeter
4. Practice cardinal principles of radiation protections: time, distance, and shielding

D. Provide quality patient care

Direct Measures: Clinical Evaluation

Criteria:

1. Identify correct patient and procedure to perform
2. Assess patient condition and respond accordingly
3. Obtain and document accurate patient history
4. Explain exam and give clear instructions
5. Communicate/interact with patients as appropriate

E. Model professional and ethical behavior consistent with the State of Wisconsin LXMO Code of Ethics

Direct Measures: Clinical Evaluation

Criteria:

1. Maintain confidentiality
2. Interact professionally with healthcare professionals, patients, and family
3. Respect diversity

F. Apply critical thinking and problem solving skills in the practice of diagnostic radiography

Direct Measures: Clinical Evaluation

Criteria:

1. Adapt procedures to patient condition
2. Adapt exposure techniques to patient's physical and pathological conditions
3. Evaluate image for diagnostic quality and implement corrective action if necessary
4. Use logic and judgement in performing procedure efficiently

Wisconsin Department of Safety and Professional Services

COURSE CONFIGURATION: (hours and credits):

<u>Required Hours</u>	<u>Course Title</u>	<u>Minimum Required Credits</u>
48	Introduction to Radiography (48 required)	3
48	Radiographic Imaging 1 (48 required)	3
48	Radiographic Imaging 2 (48 required)	3
32-80	Radiographic Procedures 1 (32-80 required)	2-5
48	Imaging Equipment Operation (48 required)	3
48	Radiation Protection and Biology (48 required)	3
16	Radiographic Pathology (16 required)	1
96-340	Radiography Clinical (96-340 required)	3-6
<u>384-432</u>	Total Program Hours*	<u>21-27</u>

Program Course Detail:

Introduction to Radiography

Credits 3

Course Description Introduces students to the role of radiography in health care. Students apply medical terminology, legal and ethical considerations to patient care and pharmacology in the radiologic sciences.

Program Outcomes
 Practice radiation safety principles
 Provide quality patient care
 Model professional and ethical behavior consistent with the A.R.R.T. Code of Ethics
 Apply critical thinking and problem solving skills in the practice of diagnostic radiography

Radiographic Imaging

Credits 3

Course Description Introduces radiography students to the process and components of analog imaging. Students determine the factors that affect image quality including contrast, density, detail, and distortion.

Program Outcomes
 Carryout the production and evaluation of radiographic images
 Model professional and ethical behavior consistent with the A.R.R.T. Code of Ethics
 Apply critical thinking and problem solving skills in the practice of diagnostic radiography

Radiographic Imaging

Credits 3

Course Description Explores film processing components as well as the principles and operation of digital imaging systems found in diagnostic radiology. Factors that impact image acquisition, display, archiving, and retrieval are discussed. Guidelines for selecting exposure factors and evaluating images within analog and digital systems. Principles of digital system quality assurance and maintenance are presented.

Program Outcomes
 Carryout the production and evaluation of radiographic images
 Model professional and ethical behavior consistent with the A.R.R.T. Code of Ethics
 Apply critical thinking and problem solving skills in the practice of diagnostic radiography

Radiographic Procedures 1

Credits 2-5

Course Description Prepares radiography students to perform routine radiologic procedures on various parts of the body including the upper body, hip, pelvis, and ankle. Students apply knowledge of human anatomy to position the patient correctly to achieve the desired result.

Program Outcomes
 Carryout the production and evaluation of radiographic images
 Practice radiation safety principles

Radiation Protection and Biology

Credits 3

Course Description Prepares radiography students to protect themselves and others from exposure to radioactivity. Students examine the characteristics of radiation and how radiation affects cell biology. Students apply standards and guidelines for radiation exposure.

Program Outcomes
 Practice radiation safety principles
 Provide quality patient care

Wisconsin Department of Safety and Professional Services

Radiographic Pathology

Credits	1
Course Description	Prepares radiography students to determine the basic radiographic manifestations of pathological conditions. Students classify trauma related to site, complications, and prognosis and locate the radiographic appearance of pathologies.
Program Outcomes	Carryout the production and evaluation of radiographic images Apply critical thinking and problem solving skills in the practice of diagnostic radiography Model professional and ethical behavior consistent with the A.R.R.T. Code of Ethics

Radiography Clinical

Credits	3-6
Category	Technical Studies
Course Description	This beginning level clinical course prepares radiography students to perform radiologic procedures on patients with extensive supervision and direction. Students apply radiation protection and standard precautions in the production of radiographs in a health care setting while adhering to legal and ethical guidelines. An emphasis of the course is the development of communication and critical thinking skills appropriate to the clinical setting.
Program Outcomes	Carryout the production and evaluation of radiographic images Practice radiation safety principles Provide quality patient care Apply computer skills in the radiographic clinical setting Model professional and ethical behavior consistent with the A.R.R.T. Code of Ethics Apply critical thinking and problem solving skills in the practice of diagnostic radiography
