Workgroup Request

Motion from 5/11/18 Workgroup Meeting:

MOTION: Peter Kallio moved, seconded by Timothy Westlake, to request that PDMP staff generate reports containing the following data:

1. Number of patients with over 300 MMEs per day
2. Number of patients with over 300 MMEs with benzodiazepines per day
3. Identifying the practitioners prescribing to patients in bullets 1 & 2
4. Practitioners with the highest total MMEs monthly
5. Pharmacies associated with dispensing to patients identified in bullets 1, 2 & 4
6. Patients with highest MMEs and identifying the prescribers
7. Practitioner by profession containing number of patients, number of prescriptions, and total doses, identifying practitioners who are 2 standard deviations in 2 of 3 categories
8. Prescribers who are not checking PDMP
9. Pharmacies who are not submitting data to PDMP

Motion carried unanimously.

Overview of Current Data Sources

- PDMP User Profiles
  - Registration information (profession/specialty)
  - PDMP usage report
- Prescriber Metrics Report Data
  - Monthly report, 100-day rollup
  - Volume of scripts and doses, by class, percentile for profession
- Dispensing Data
  - MME/script
  - # of scripts, days' supply
- Prescriber Reports
  - Identification of patients, co-prescribing
- Dispenser Submission History

Dispenser Compliance

- Number of licensed pharmacies (as of 6/30/18): 2255

- Number of exempt pharmacies: 506

- Number of dispensers expected: 1749

- Number of dispensers on record (June): 1633 (93% compliance)

Prescriber Compliance

- Number of DEAs with dispensings (does not take into account exceptions to review requirement): 46,288
- Number of registered prescribers: 22,609
- Registered with no patient queries in June: 5,420 (3,739 with fewer than 20 rx)
- Focus?
  - Number of those not registered who have prescribed opioids
  - Prescribers who have fewer than 100 opioid rx/mo
  - Prescribers who have high volume of short duration rx
- Outreach opportunity
  - Requirement
  - Benefits of checking, having an account

Analysis of Opioid Dispensing Data

Prescribing of Most Common Opioids: February 2018
1. Hydrocodone-Acetaminophen Tab
2. Hydrocodone-Ibuprofen Tab
3. Oxycodone HCl Cap
4. Oxycodone w/ Acetaminophen Tab
5. Oxycodone-Aspirin Tab

Prescriptions written for 3 days or less: 45,519

Total number of prescriptions written for 10 or more pills per day: 13,137

- Number of DEA Numbers/Prescribers: 4,430
- 219 Prescribers wrote 10 or more prescriptions in February for over 10 pills per day, accounting for 25% of the 13,137
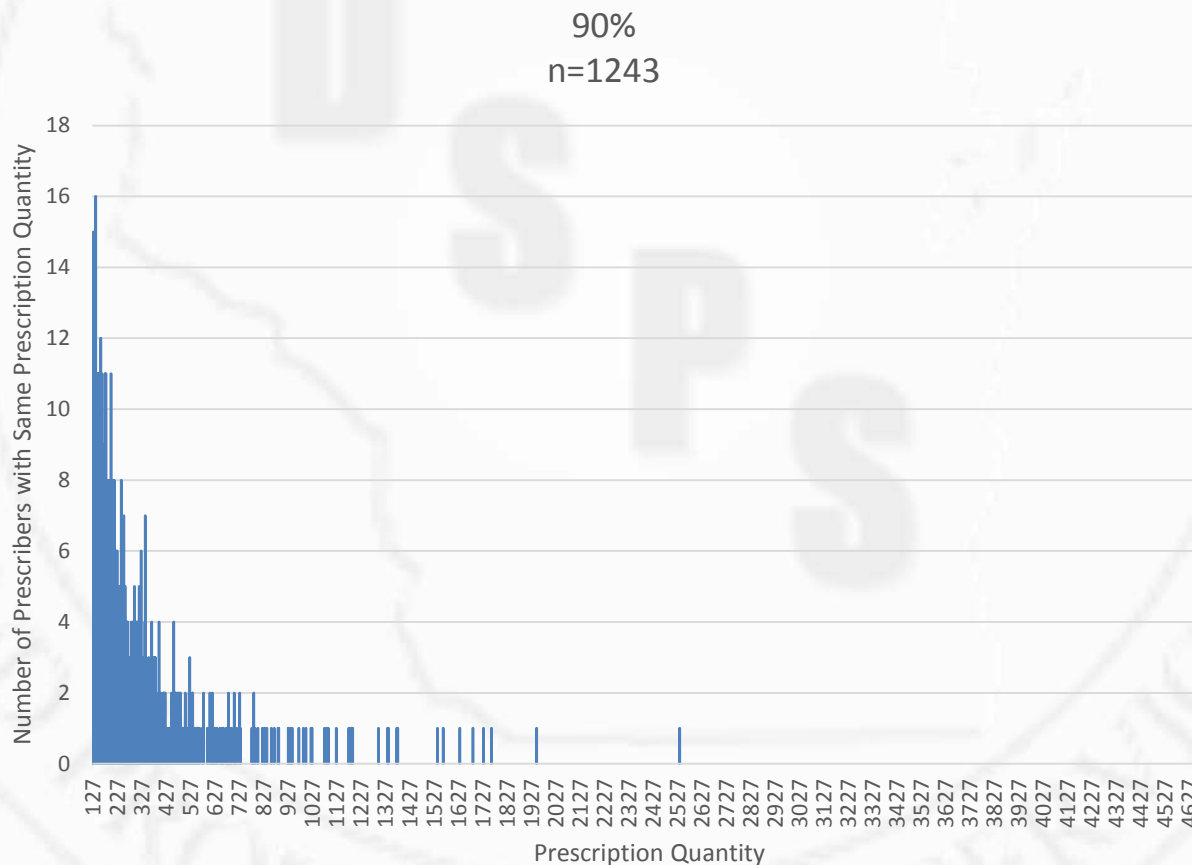

Patient MME

- Patients with MME at or above 300, Q2 2018 = 9691
  - At or above 500 = 3282
  - At or above 700 = 1249
  - At or above 1000 = 434
  - At or above 1500 = 140
