***Below, the highlighted material is the material that was created by the previous rule. RAD 4.02 (3) and (4). This was inadvertently not included in the previous rule.***

## **Chapter RAD 4**

### **SCOPE OF PRACTICE**

[RAD 4.01](#) Radiographer scope of practice.

[RAD 4.02](#) Limited X-ray machine operator scope of practice.

---

#### **RAD 4.01 Radiographer scope of practice.**

**(1) GENERAL SCOPE OF PRACTICE.** The practice of a radiographer involves the performance of radiography and radiographic procedures and related techniques to produce images for the interpretation by, or at the request of, a licensed practitioner. Radiographers perform the radiographic examination to create the images needed for medical diagnosis and apply scientific knowledge, technical skills, patient interaction, and care necessary to obtain diagnostic information. Radiographers may apply radiation to any part of the human body and may administer contrast agents and related substances for diagnostic purposes.

**(2) APPLICABLE STANDARDS.** The scope of practice of a licensed radiographer includes all of the following, as defined in the ASRT Practice Standards for Medical Imaging and Radiation Therapy, 2019 American Society of Radiologic Technologists:

- (a)** Administering medications parenterally through new or existing vascular access, enterally or through other appropriate routes as prescribed by a licensed practitioner.
- (b)** Administering medications with an infusion pump or power injector as prescribed by a licensed practitioner.
- (c)** Applying principles of ALARA to minimize exposure to patient, self, and others.
- (d)** Applying principles of patient safety during all aspects of patient care.
- (e)** Assisting in maintaining medical records, respecting confidentiality and established policy.
- (f)** Corroborating a patient's clinical history with procedure and ensuring information is documented and available for use by a licensed practitioner.
- (g)** Educating and monitoring students and other health care providers.
- (h)** Evaluating images for proper positioning and determining if additional images will improve the procedure or treatment outcome.
- (i)** Evaluating images for technical quality and ensuring proper identification is recorded.

- (s) Selecting the appropriate protocol and optimizing technical factors while maximizing patient safety.
- (t) Starting, maintaining, and removing intravenous access as prescribed by a licensed practitioner.
- (u) Verifying archival storage of data.
- (v) Verifying informed consent for applicable procedures.
- (w) Assisting the licensed practitioner with fluoroscopic and specialized radiologic procedures.
- (x) Performing diagnostic radiographic and noninterpretive fluoroscopic procedures as prescribed by a licensed practitioner.

**Note:** The standard is available from the American Society of Radiologic Technologists' website at [www.asrt.org](http://www.asrt.org).

#### **RAD 4.02 Limited X-ray machine operator scope of practice.**

- (1) GENERAL SCOPE OF PRACTICE. The LXMO performs radiographic procedures and related techniques within the practice of radiography under the supervision of a licensed radiographer or other health care provider, consistent with the LXMO's limited scope education, training, and examination.
- (2) APPLICABLE STANDARDS. The scope of practice of an LXMO includes all of the following, as defined in the ASRT Practice Standards for Medical Imaging and Radiation Therapy, 2019 American Society of Radiologic Technologists:
  - (a) Applying principles of ALARA to minimize exposure to patient, self, and others.
  - (b) Applying principles of patient safety during all aspects of patient care.
  - (c) Assisting in maintaining medical records, respecting confidentiality and established policy.
  - (d) Corroborating a patient's clinical history with procedure and ensuring information is documented and available for use by a licensed practitioner.
  - (e) Evaluating images for proper positioning and determining if additional images will improve the procedure or treatment outcome.
  - (f) Evaluating images for technical quality and ensuring proper identification is recorded.

- (g) Identifying and responding to emergency situations.
- (h) Performing ongoing quality assurance activities.
- (i) Postprocessing data.
- (j) Preparing patients for procedures.
- (k) Providing education.
- (L) Providing optimal patient care.
- (m) Selecting the appropriate protocol and optimizing technical factors while maximizing patient safety.
- (n) Verifying archival storage of data.
- (o) Assisting a licensed practitioner or radiographer during static radiographic procedures.
- (p) Performing diagnostic radiographic procedures, as prescribed by a licensed practitioner, of a specific area of anatomical interest based on limited education, training, and licensure or certification within the individual's scope of practice.

**Note:** The standard is available from the American Society of Radiologic Technologists' website at [www.asrt.org](http://www.asrt.org).

**(3) COMPUTED TOMOGRAPHY.** Performing the aspects of computed tomography that involve applying x-rays to patients requires a radiographer license. Performing the aspects of computed tomography that do not involve applying x-rays to patients does not require a radiographer license or LXMO permit.

**(4) NUCLEAR MEDICINE.**

**(a)** Performing nuclear medicine without the use of x-rays does not require a radiographer license or LXMO permit.

**(b)** Performing PET-CT or SPECT-CT does not require a radiographer license or LXMO permit if x-rays are applied only for the purpose of attenuation correction. A radiographer license is required if x-rays are applied for a purpose other than attenuation correction.

**(c)** Performing nuclear medicine does not require a radiographer license or LXMO permit if x-rays are applied only for the purpose of attenuation correction. A radiographer license is required if x-rays are applied for a purpose other than attenuation correction.

PROPOSED ORDER

An order of the Radiography Examining Board to *create* RAD 4.01 (3) and (4) relating to scope of practice.

Analysis prepared by the Department of Safety and Professional Services.

ANALYSIS

**Statutes interpreted:**

Section 462.06 (2), Stats.

**Statutory authority:**

Sections 15.08 (5) (b), 227.11 (2) (a), and 462.06 (2), Stats.

**Explanation of agency authority:**

Section 15.08 (5) (b), Stats., provides that each examining board “[s]hall promulgate rules for its own guidance and for the guidance of the trade or profession to which it pertains, and define and enforce professional conduct and unethical practices not inconsistent with the law relating to the particular trade or profession.”

Section 227.11 (2) (a), Stats., provides that “Each agency may promulgate rules interpreting the provisions of any statute enforced or administered by the agency, if the agency considers it necessary to effectuate the purpose of the statute, but a rule is not valid if the rule exceeds the bounds of correct interpretation.”

Section 462.06 (2), Stats.: “The board may promulgate rules that establish a code of ethics for persons who hold a license or limited X-ray machine operator permit under s. 462.03.”

**Related statute or rule:**

None.

**Plain language analysis:**

The objective of the proposed rule is to clarify and add detail to the regulations on when a radiographer license or LXMO permit is required for the use of various medical imaging

technologies. Chapter RAD 1, Wis. Admin. Code, contains definitions for the radiography code, and chapter RAD 4 contains regulations on scope of practice for radiographers and limited X-ray machine operators. In chapter RAD 4, the proposed rule creates new regulations that clarify and add detail to the state's licensing requirements for the use of computed tomography and nuclear medicine. Performing the aspects of computed tomography that involve applying x-rays to patients requires a radiographer license. Performing nuclear medicine does not require a radiographer license or LXMO permit if x-rays are applied only for the purpose of attenuation correction. A radiographer license is required if x-rays are applied for a purpose other than attenuation correction.

**Summary of, and comparison with, existing or proposed federal regulation:**

None.

**Summary of public comments received on statement of scope:**

None.

**Comparison with rules in adjacent states:**

**Illinois:**

Rules of the Illinois Emergency Management Agency provide for credentialing in the use of medical radiation technology in Illinois [32 Ill. Admin. Code 401]. These rules require the credentialing of any person who applies ionizing radiation to humans or who otherwise uses medical radiation technology, unless specifically exempted by their statutes and rules. This is a broad requirement and includes the disciplines of medical radiography, nuclear medicine technology, radiation therapy technology, and chiropractic radiography. Their code is extremely comprehensive on this topic and provides definitions and regulations on these medical roles and many more. It also provides definitions and regulations on the different types of medical imaging technologies. Applicants can be credentialled in one or more of the following categories: Medical Radiography, Nuclear Medicine Technology, Radiation Therapy Technology, Chiropractic Radiography, Limited Diagnostic Radiography, Radiologist Assistant, and Nuclear Medicine Advanced Associate.

**Iowa:**

641 IAC 42 requires credentialing of individuals who operate or use ionizing radiation producing machines or administer radioactive materials on or to human patients or human research subjects for diagnostic or therapeutic purposes. The code does provide exemptions for licensed medical practitioners. Similar to Illinois, the code provides definitions for the various related medical imaging technologies and medical roles, such as computed tomography, nuclear medicine procedure, nuclear medicine technologist, PET/CT, radiation therapist, and others. It provides comprehensive regulations for licensees in the following categories: general radiologic technologist, general nuclear medicine technologist, radiation therapist, radiologist assistant, limited radiologic technologist, X-ray equipment operator, and others.

**Michigan:**

The state of Michigan does not license operators of x-ray machines, nor does it have any requirements for licensure or credentialing of x-ray machine operators except for operators of mammography machines (Mich Admin Code, R 333.5630) and CT machines (Mich Admin Code, R 325.5705). Mammographic examinations must be performed by a radiologic technologist who meets the requirements of 21 C.F.R. 900.12 (a) (2), "Radiologic technologists" (2000). CT examinations must be performed by a radiologic technologist who meets the Michigan code's licensing requirements or by a licensed physician or osteopathic physician.

**Minnesota:**

The Minnesota Statutes, Section 144.121 regulate the use of x-ray systems on living humans. To operate an X-ray system, individuals must have passed a national or state examination. These include the American Registry of Radiologic Technologists (ARRT) radiography examination, the American Chiropractic Registry of Radiologic Technologists examination, the ARRT radiation therapy examination, the Minnesota examination for limited scope x-ray operators, the Minnesota examination for bone densitometry equipment operators, or others. Cardiovascular technologists must be credentialed by Cardiovascular Credentialing International. Nuclear medicine technologists must be credentialed by the Nuclear Medicine Technology Certification Board, the ARRT for nuclear medicine technology, or the American Society of Clinical Pathologists. Minnesota also provides credentialing exemptions for licensed dental health practitioners and other health care practitioners.

**Summary of factual data and analytical methodologies:**

The proposed rules were developed by the Radiography Examining Board reviewing the current statutes and codes that regulate the use of medical imaging technologies and determining where more clarity and updates are needed in the code.

**Analysis and supporting documents used to determine effect on small business or in preparation of economic impact analysis:**

The proposed rules will be posted for a period of 14 days to solicit public comment on the economic impact of the proposed rule, including how this proposed rule may affect businesses, local government units, and individuals.

**Fiscal Estimate and Economic Impact Analysis:**

The Fiscal Estimate and Economic Impact Analysis will be attached upon completion.

**Effect on small business:**

These proposed rules are not expected to have an economic impact on small businesses, as defined in s. 227.114 (1), Stats. The department's Regulatory Review Coordinator may be contacted at Jennifer.Garrett@wisconsin.gov or (608) 266-2112.

**Agency contact person:**

Jake Pelegrin, Administrative Rules Coordinator, Department of Safety and Professional Services, Office of Chief Legal Counsel, P.O. Box 14497, Madison, Wisconsin 53708-0497; email at [DSPSAdminRules@wisconsin.gov](mailto:DSPSAdminRules@wisconsin.gov).

**Place where comments are to be submitted and deadline for submission:**

Comments may be submitted to Jake Pelegrin, Administrative Rules Coordinator, Department of Safety and Professional Services, Office of Chief Legal Counsel, P.O. Box 14497, Madison, Wisconsin 53708-0497; or by email to [DSPSAdminRules@wisconsin.gov](mailto:DSPSAdminRules@wisconsin.gov). Comments must be received at or before the public hearing to be included in the record of rule-making proceedings.
