#3070OEE (Rev. 2/22)
Instructions: Use this form to apply for approval to offer your course for continuing education credit.

Step 1: Complete the first page of this form. Please include all contact information including email address.
  o Some credential types require an initial ‘Qualifier’ course be completed before an applicant can apply for their credential. If your course is designed to be offered as a ‘Qualifier’ training course, be sure to check the proper box, and include the term ‘Qualifier’ as the first word in the title.

Step 2: Provide the following application materials:
  o Course summary describing in detail the subject matter to be taught and how this course relates to the job activities and responsibilities of the credential categories you have indicated on the application.
  o Course outline detailing the total length of the course and the length of time spent on each subject. Express course length in ½ hour increments. If the course is divided into short, independent courses, submit a separate course application for each part.
  o Educational materials including handout(s), video(s), PowerPoint(s), access to online course
  o Review questions:
    o For student-paced courses (online, DVD, broadcast, correspondence):
      ▪ If this is an interactive course with knowledge checkpoints and a time requirement, submit at least 10 review questions for each credit hour you are requesting.
      ▪ If this is a question-and-answer based course using readily available public materials such as a codebook, at least 30 questions per hour must be submitted.
      ▪ Students must correctly answer at least 70% of the questions to receive credit.
    o For instructor-led, face-to-face courses (including webinar, Microsoft Teams etc.) review questions are not required.

Step 3: Send the educational course application and application materials to the address on the application at least 30 days prior to the date the course will be offered. You may also email this application and course materials to DSPScourseapproval@wisconsin.gov.

Step 4: Courses will be approved or denied within 21 calendar days of receiving this application. Do not offer your course for credit before you have received approval. Students who complete your course before it is approved will not receive credit. When your course is approved, a letter will be sent showing the hours of approved credit, the credentials to which the hours of approved credit apply, the expiration date of the course, and the course identification number.

Step 5: After you have received approval, you may offer your course for credit. You must:
  o Maintain an attendance record of all students who have successfully completed the course for at least five years from the course completion date. The record must include the course identification number, the course completion date, the name of each student, and the student’s customer ID number. Note: Be sure to obtain the customer ID number of the student, and not of the student’s business.
  o Provide a written, printed, or e-mailed attendance record to each student. This record must include the course identification number, the course completion date, the name of the student, and the student’s customer ID number. Instruct your students to retain this document for their records.
  o Report all course attendance information to the Department of Safety and Professional Services within 14 calendar days of the course completion date. Use the information on your course approval letter to report this information electronically.

Step 6: Course approvals have a five-year term. A renewal notice will be sent at least 30 days before the expiration date. If a course is not renewed, students attending the course after the expiration date will not receive credit.
