

## Frequently Asked Questions

2019-2021 Fee Changes for  
Professional Licenses/Credentials  
*Effective Date: July 1, 2019*

**Why are the fees changing for professional license credentials and renewals?** Wisconsin Statute [§ 440.03\(9\)\(a\)](#) requires the Department of Safety and Professional Services (DPS) to conduct a fee study every two years. According to the statute, fees charged to occupations and businesses under the department's authority must reflect the approximate administrative and enforcement costs of regulating those professions under Chapters [440 to 480 of Wis. Stat.](#) The study enables DPS to remain in compliance with state laws.

**Are all licenses/credentials regulated by DPS included in the fee study?** No. Wisconsin statutes do not require DPS to conduct a fee study for trades credentials (Refer to **Appendix A** for a List of Trades). Instead, these fees are set through the Administrative Code under [SPS Ch. 305.02](#). The most recent update of the fees for trades credentials occurred in 2006 (based on Administrative Code Chapter SPS 305.02 legislative history).

**How many professions are included in the fee study?** 170

**How is the fee study conducted?** DPS compiles and calculates a large amount of data, including the number of license applications and renewals, revenues and expenditures, and complaints and investigations over the last two-year period. The methodology also takes a number of variables into account, including adjustments for inflation. Refer to **Appendix B** for a detailed explanation.

**What are the new fees?** The new fees vary by profession, with equal fees for both initial applications and renewals. Most initial application fees are set at \$43 with a maximum initial application fee of \$75. Refer to **Appendix C** for a complete list of the new fees.

**When will the new fees go into effect?** The new fees will take effect beginning with initial license applications received in the Department and/or postmarked on or after July 1, 2019, and for license renewals that have an effective date of July 1, 2019 or later. It should be noted that if a license holder receives a notice of renewal prior to July 1, 2019, for a renew-by date of after July 1, 2019, the new fees will apply regardless of when the notice is received or when payment is made. If a license holder's renewal-by date is before July 1, 2019, and the payment is made after July 1, 2019, the fee noted on the notice of renewal will still apply. If the license holder's renew-by date is on or after July 1, 2019, the new fees will apply.

**What if I mistakenly pay the previous fee and require a refund?** When program staff identify an over-payment, a refund check will be sent to the license/credential holder.

## Frequently Asked Questions

2019-2021 Fee Changes for  
Professional Licenses/Credentials  
*Effective Date: July 1, 2019*

**Are any fees going up?** For all but two professions, initial application and renewal fees will be reduced or maintained at the current level. The exception is the fee for Chiropractic X-Ray Technician and Chiropractic Technician, which did not comply with the requirement specified in [Wis. Stat. §440.03\(9\)\(b\)](#) that the initial application fee must not be greater than the renewal fee. As such, the renewal fee was adjusted to match the initial fee, changing it from \$44 to \$53.

**When was the last time there were any significant changes to the fees?** The 2009-2011 biennium was the last time major adjustments were made to the fees. Since then, there have been only minor adjustments, as well as the addition of several licensed professions or businesses.

**Why are significant fee changes occurring now?** This is the first fee study to fully utilize data that is significantly more accurate and detailed regarding the costs and revenues associated with administering each of these professional credentials. This creates a wider variation in fees as well.

**How many professions will see a fee reduction?** At least one of the fees (initial and/or renewal) were reduced for 127 licenses/credentials (approximately 75 percent). An estimated 361,000 Wisconsin license credential applicants (approximately 96 percent) will receive a reduced fee over the next biennium.

**What is the overall impact on all professional licenses/credentials included in the study?**

- Maintaining initial and renewal fees for 43 licenses/credentials (approximately 25 percent)
- Reducing initial fees for 82 licenses/credentials (approx. 48 percent) with an average reduction of \$26.78
- Reducing renewal fees for 121 licenses/credentials (approx. 71 percent) with an average reduction of \$57.42
- Reducing both the initial and renewal fees for 80 licenses/credentials (approx. 47 percent)
- Establishing equal fees for both initial applications and renewals with a maximum fee of \$75 for 163 licenses/credentials (approx. 96 percent) (exceptions per state statute for fees related to Appraisal Management Companies and Transportation Network Companies; exception per administrative code for fees related to Unarmed Combat Sports)

## Frequently Asked Questions

2019-2021 Fee Changes for  
Professional Licenses/Credentials  
*Effective Date: July 1, 2019*

- Removing Barber Manager and Cosmetology-Manager fees for licenses that the Legislature eliminated during the previous legislative session.

**Does DSPS consider factors like earnings, earning potential, or hours worked when determining fees?** No. [Wisconsin State Statute § 440.03\(9\)\(a\)](#) does not permit DSPS to consider any factors beyond the estimated cost of the administration and enforcement related to each professional license/credential. The license/credential fee process does not take into consideration actual earnings or earning potential from the regulated profession nor does it consider the extent to which the individual practices the profession (e.g., every day or just one day out of the year).

**Will fee reductions impact customer service?** The fee changes are based on actual operating costs and revenues for DSPS for fiscal years 2017 and 2018 (July 1, 2016 to June 30, 2018). The new fees are projected to continue to provide sufficient revenue to cover existing operating expense, while also providing for staffing levels that will enable DSPS to provide the level of customer service our constituents expect.

**Are tax dollars used to support the cost of licensing and credentialing regulated professions?** No, DSPS is funded 100 percent by program revenue, including licensing and credentialing fees.

2019-2021 Fee Changes for  
Professional Licenses/Credentials  
*Effective Date: July 1, 2019*

### Appendix B

#### How does DSPS conduct the fee study?

DSPS staff prepare the fee study by compiling data that includes the following:

- The number of initial and renewal licenses issued per year, over the previous biennium, by each professional license type administered by DSPS
- The appropriate fee DSPS charges for each of those professional licenses
- Revenue collected by DSPS by year over the previous biennium organized by profession, board, and program
- Expenditures spent by DSPS by year over the previous biennium organized by profession, board, and program

Staff compile the information above into a spreadsheet, and then use formulas and calculations to allocate revenues and expenditures by profession, board, and program.

- Revenues and expenditures assigned to a profession are allocated based on the number of issued licenses for that profession
- Revenues and expenditures recorded at the board-level are allocated among each of the professions that board oversees, based on the number of issued licenses
- Revenues and expenditures at the program level are allocated among all professions based on the number of initial and renewal licenses issued

The fee study methodology accounts for several variables, including:

- Adjustments for inflation – factored at 3% annually (including wages, fringe benefits, limited-term employees, and supplies and services)
- Variation in licensure/credential participation rates, complaints and investigations, and other major projects, factored in at a rate of 10% over the biennium
- Using a technique called “smoothing,” revenue and expenditure variations are aggregated at the board- and program-level only and then allocated to each profession within each board equally to determine a uniform fee for the entire group
