DSPS Building Permit System Application Programming Interface (API) v2.0

IT third party systems like "IWorq" or "Safebuilt" can connect to DSPS Building Permit System by using Web Service. This method allows setting up an electronic transfer of permits between diverse IT systems. Below is the Web Services Description Language (WSDL) for the Permit System:

Web Service WSDL

From the listed WSDL, you can reference the availability of the web method “Submit”:

```
string Submit(string muniAccessKey, string permitData)
```

This web method takes two input parameters of literal/string data types and returns value of literal/string data type.

Input Parameters:

- **MuniAccessKey** is a unique identifier and will be given to the Municipality upon finishing the onboarding process with DSPS.
- **PermitData** is a “|” piped delimited literal/string of permit record. The following are the expected columns in the specified order (*The fields marked with * are required in a permit upload attempt*):

Output Parameter:

Return Value is a “|” piped delimited literal/string indicating either a successful or failed transaction along with the details. In the case of:

- Failed transfer attempt, “false” value in the first column is returned along with the detail message within the second column.
- Successful transfer attempt, “true” value in the first column is returned along with the detail message within the second column.

For testing your connectivity and an electronic transfer of the permit via Web Service, DSPS has created following test Municipality for integration purpose:

Township of Testville with muniAccessKey of "FY4UN18RFF"

For a production setup, an onboarding step is required with DSPS staff. Please contact the agency at DPSSBUDCTech@wisconsin.gov or 608-266-2112 and receive the MuniAccessKey for production environment.
