

Document Number _____

WATER REUSE PLUMBING SYSTEM

As authorized by Section 145 of the Wisconsin State Statutes, the Department of Safety and Professional Services hereby required this document to be recorded with this deed to inform interested parties of the use of a nonpotable water system. This plumbing was installed with the understanding of the required maintenance to keep this system operating properly and possible health risks associated with the misuse of this nonpotable water. This building is also served with a potable water system.

SPS 381.01(161) defines non-potable water as water not safe for drinking, personal or culinary use.

SPS 381.01(181) defines potable water as water that is both

- (a) Safe for drinking
- (b) Free from impurities present in amounts sufficient to cause disease or harmful physiological effects.

Description of Nonpotable Water System:

- The nonpotable water supply source is being developed through the capture of reject water generated from a water treatment device that the influent to the water treatment device is from a NR 812 or NR 812 source, the effluent is potable water, and the reject water is reused for nonpotable use.
- The intended use of the reuse water is for: WATER CLOSET/URINAL FLUSHING; VEHICLE UNDER BODY WASH; AND/OR IRRIGATION.
