2 a., 448.05 (2) (b) 4. b. and 448.05 (2) (b) 5.; and **to create** 448.01 (4), 448.01 (9e)
3 and 448.05 (2) (b) 4. c. of the statutes; **relating to:** qualification of international
4 medical graduates to practice medicine and surgery.

Analysis by the Legislative Reference Bureau

Under current law, an applicant for a license to practice as a physician in this state who is a graduate of a foreign medical college (“foreign applicant”) must provide evidence satisfactory to the Medical Examining Board (“Board”) of several facts in order to acquire a license to practice as a physician in this state. This bill makes several changes to the process that individuals who are graduates of foreign medical colleges may use to apply for and obtain a license to practice as a physician in this state by allowing an individual who is a foreign applicant to acquire a license if the individual satisfies all of the following conditions:

1. The individual is an “international medical graduate.” The bill defines “international medical graduate” as an individual who has been granted a degree of doctor of medicine or doctor of osteopathy or an equivalent degree by a “qualified international medical program,” is in good standing with the medical licensing or regulatory institution of their resident country, can speak fluently in the English language, and is lawfully admitted to work in this country. The bill defines “qualified international medical program” as any medical school, residency program, medical internship program, or other entity that is accredited by the World Federation for Medical Education or a successor organization and provides physicians with a

medical education or training outside the United States that satisfies Wisconsin medical safety, competence, and conduct standards.

2. The individual accomplishes one of the following:

a. The individual receives credit for 24 months of postgraduate training with an appropriate organization as set forth in the bill.

b. The individual is enrolled in a postgraduate training program with an appropriate organization as set forth in the bill and the applicant receives an unrestricted endorsement from the postgraduate training program director.

c. The individual provides evidence satisfactory to the Board that the individual has been continuously engaged in the practice of medicine and surgery outside this state for at least three years.

3. The individual satisfies any other requirements established by the Board by rule. The bill restricts the Board from establishing rules requiring the applicant to have an amount of experience that exceeds what is otherwise required under law, and from establishing rules requiring the applicant to have practice experience in specified locations beyond what is required under law.

Finally, the bill eliminates the requirement under current law that an individual who is a foreign applicant obtain certification from the Educational Council for Foreign Medical Graduates or its successor organization in order to acquire a license to practice as a physician in this state.

For further information see the state fiscal estimate, which will be printed as an appendix to this bill.

The people of the state of Wisconsin, represented in senate and assembly, do enact as follows:

1 **SECTION 1.** 448.01 (4) of the statutes is created to read:
